

Health Screening Checklist (COVID-19)

Families are REQUIRED to conduct a health screening each morning prior to school.

This form is for family use only and does not need to be submitted to anyone. It is meant to serve as a reminder and guide as to what is expected.

Have you had any of the following symptoms since the last time you were at school/work that you cannot attribute to another health condition? Symptoms can range from mild to severe illness and appear 2-14 days after you are exposed to the virus that causes COVID-19.

Only mark if the answer is “Yes” to each question*.

Do you have:

- Fever at or above 100.4 degrees or chills (parents must check their child(ren)’s temperature prior to school every day)**
- Cough**
- Sore throat**
- Shortness of breath or difficulty breathing**
- Nausea or vomiting**
- Diarrhea**
- Muscle pain/aches**
- Headache**
- New loss of taste or smell**

***If you answered “Yes” to any of the screening questions above, stay home/keep your child home, stay away from other people, and monitor your symptom(s). If your symptom(s) continue for more than 24 hours, contact your health care provider for guidance.**

The mitigation of COVID 19 is a community issue. It is an issue where we need everyone’s cooperation and support. It is imperative that we have the cooperation of our parents/guardians with checking their child(ren)’s temperatures and not sending them to school with a fever or other symptoms. By the time students arrive at school, they have already been at the bus stop, on the bus, and in the hallways of our schools. Please help stop the spread and err on the side of caution if your child(ren) are not feeling well.
